BI & Data Analyst

6+ years in analytics | Power BI · DAX · Tableau · SQL · Python · DBT

BI and Data Analyst with a background in product analytics, data modeling, and dashboard development.

Experienced in building end-to-end reporting solutions — from SQL data modeling and DAX measures

to Power BI and Tableau dashboards used by business and management stakeholders. Background spans SaaS products, demand forecasting, and marketing metrics analysis.

My thesis at Metropolia focused on designing a product analytics framework for wearable health tracking — combining DBT, SQL, and modern data stack principles.

Open to BI, Data, and Product Analyst roles in Finland and EU.

EXPERIENCE

Senior Product Analyst

Timebook Ltd (WFM SaaS) | Dec 2021 – Feb 2023

- Set up product and event analytics system from scratch — defined key metrics, implemented tracking, built automated reporting
- Built and maintained dashboards in Power BI, Tableau, and Superset tracking core product KPIs across acquisition, engagement, and retention
- Conducted retention and user behavior analysis using SQL and Python; evaluated A/B tests and supported hypothesis prioritization
- Collaborated with product, engineering, and business teams to translate business questions into data solutions

Product Analyst

Satellite Company LLC (WFM SaaS) | 2017 – 2021

(Part-time concurrent role: Product Manager, Sputnik Logistic)

- Developed a custom demand forecasting model in Excel for TV set-top box sales at national scale during Russia's analog-to-digital broadcasting transition — used to plan procurement and inventory across all regions *(Sputnik Logistic)*
- Built Power BI dashboards tracking sales performance and inventory levels across product categories *(Sputnik Logistic)*
- Analyzed product and marketing metrics: LTV, ROI, CAC, CR — funnels and cohort analysis
- Conducted A/B tests and measured impact of product changes on key metrics
- Built KPI reports and dashboards in Power BI and Tableau for stakeholders
- Performed competitive analysis and market research to support product strategy

Tech stack: SQL (analytic functions, window functions, aggregations) · Python · Power BI · Tableau · Git · Airflow

Energo LLC (Electronics Retail) | 2015 – 2017

- Built sales and profitability dashboards in Power BI and Excel to track key category performance indicators
- Prepared management reports and presentations on revenue, turnover, and financial results
- Conducted pricing and competitive analysis across product categories

EDUCATION

Bachelor of Business Administration

Metropolia University of Applied Sciences | 2026

Thesis: "Design and Evaluation of a Product Analytics Framework for a Wearable Health Tracking Application"

Stack: DBT · SQL · Python

Data Analysis with Python

University of Helsinki | 2024

Google Advanced Data Analytics

Google | 2022

Specialist Degree in Commerce

Amur State University | 2008

CERTIFICATIONS

- dbt Fundamentals — dbt Labs | Feb 2026
- SQL for Data Analysis: Advanced SQL Querying Techniques — Udemy | Apr 2026
- PL-300 Certification Prep: Microsoft Power BI Data Analyst — Udemy | Apr 2026

SKILLS

Area	Tools & Skills
Business Intelligence	Power BI (Desktop, Service), DAX, Power Query, data modeling, star schema
Data & Querying	SQL (CTEs, window functions, aggregations), Python (pandas)
Data Visualization	Power BI, Tableau, Looker Studio
Data Transformation	DBT, Git, Airflow
Analytics Methods	KPI definition, A/B testing, cohort analysis, funnel analysis, user behavior analysis
Tools	Azure (Data Factory, Blob Storage, cloud fundamentals), Jira, Confluence
Languages	English (B2), Finnish (beginner, improving), Russian (native)
